LEGEND

Reported as the mean \pm SEM. N is the number of animals, number of cages for group housed adult animals or number of litters.

Consumption is not reported for the non-pregnant animals during gestation and lactation phases

Consumption is not reported for animals during mating

Consumption data is not analyzed for lactation periods that end after LD 14 due to possible consumption by pups.

In multiple breeding/littering studies Litter A is the default designation for the first litter; subsequent litters would be B, C etc.
