Data are displayed as mean ± standard error and do not include nonpregnant animals.

(g) = grams; GD = Gestation Day.

[a]Statistical analysis performed by Jonckheere's test (trend) and Williams' or Dunnett's test (pairwise). Body weight gains and food consumption for pregnant animals are given in grams/day and grams/animal/day, respectively.

[b]Statistical analysis performed using the random effects model (trend and pairwise).

**Statistically significant ($p \leq .01$) trend (denoted in vehicle control column) or pairwise comparison (denoted is dosed group column).
