

**Table 1.** GHS potency categories

<b>GHS category</b>	<b>LLNA EC3</b>	<b>Human threshold</b>
1A (strong)	≤2%	≤500 μg cm <sup>-2</sup> skin area
1B (other than strong – “weak” <sup>a</sup> )	>2%	>500 μg cm <sup>-2</sup> skin area
Non-sensitizer	Unclassified	Unclassified

EC3, estimated test substance concentration that produces a stimulation index of 3, the threshold for a substance to be considered a sensitizer in the LLNA; GHS, United Nations Globally Harmonized System of Classification and Labeling; LLNA, murine local lymph node assay.

<sup>a</sup> For simplicity in this paper, we refer to Category 1B sensitizers as “weak”; this term is not used in the GHS.
