

Table 1. Estimation of Animals Employed on Standard, Stand-alone, National Toxicology Program Toxicity Studies in Comparison to the Modified One-Generation (MOG) Study.

Study type	No. of groups	Animals/ group	Total at study start	Estimated total generated
90-Day subchronic	6	20	120	120
Multigeneration reproduction		40	160	2,400
Prenatal developmental toxicity	4	20	80	1,200
Developmental neurotoxicity	4	20	80	1,200
Combined			440	4,920
MOG	4	20	80	3,400
