

CEBS Routine Maintenance Schedule

DTT strives to keep CEBS accessible 24/7 however interruptions to the NCI cloud and NIEHS network among other disruptions beyond our control can interfere with this goal.

CEBS homepage is served through NCI's Amazon Cloud, NCI network has scheduled downtimes: The production system is patched on the third Saturday of the month, starting at 6 AM Saturday, Eastern.

This generally completes by 10 AM. This will impact CEBS public components including the CEBS homepage and DTT Guided Search applications such as DTT Data Collections and Organ Sites with Neoplasia.

The NIEHS network has scheduled downtimes:

The production system is patched on the third Friday of the month, starting at 5 PM Friday, Eastern. This can run through the weekend, depending on the work needed. This will impact legacy CEBS data pages, and modules that require log-in.

It is possible that the network will be down at other times, and that other outages may occur. We apologize for this inconvenience. Please contact CEBS-Support@mail.nih.gov for assistance.
